Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 29 July 2005.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 07/29/2005, with respect to claims 1-20 have been fully considered and are persuasive. The 35 U.S.C 103 rejections of claims 1-20 have been withdrawn.

Double Patenting

2. The provisional double patenting rejection against now abandoned applications: 10/093921, 10/051264, 10/061997 and 10/093779 has been withdrawn under the assumption that these aforementioned applications will not be revived at some later date. Should they be revived, a terminal disclaimer must be filed.

Claim Objections

3. Claim 1 objected to because of the following informalities: "handled" should be "handheld" in line 12. Appropriate correction is required.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "160" has been used to designate multiple different ports. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 158 in Fig. 1, 200 and 218 in Fig. 2. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office

Art Unit: 2182

action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

6. The disclosure is objected to because of the following informalities: acronym “IDS” should be defined upon first use on page 3, line 16, immediately after the terms “intelligent docking station”.

Appropriate correction is required.

Allowable Subject Matter

7. Claims 1-20 are allowable over the prior art except for the art cited in the outstanding double patenting rejection.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, *all* the limitations of the independent claim(s) (claim 1, 10 and 12), particularly where a device, docking station and handheld computer are separate and different entities existent apart, e.g., not integrated together spatially or functionally, and a top-level driver in communication with a second OS present on the docking station, where the top-level driver translates and transfers data between the handheld computer, which has a first OS, and the docking station and a low-level driver translates data between the docking station and the device. The second operating system is independent of the first operating system, such that communication with the device does not require participation of the first operating system.

8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to intelligent docking stations and drivers in communication with peripherals:

U.S. Pat. No. 5,819,112 to Kusters discloses a laptop computer (element 8) that is docked to a switch (multiplexer, element 30), which can connect to multiple peripheral devices (32n), where each device has a respective low level device driver (element 38n) which required for communicate and operation with each peripheral device. While Kuster shows that peripheral devices connected externally to the laptop via a docking switch require low level drivers, Kuster is absent an intelligent docking station, which has a coprocessor and operating system.

Conclusion

10. This application is in condition for allowance except for the following formal matters: the claim, drawings and specifications objections above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
